

## GRADUATE SOFTWARE ENGINEER

### THE TEAM

Our developers join an existing team of focused individuals who are excited by adopting new technologies to revolutionise existing industries.

### THE CHALLENGE

Our objective is to continue to revolutionise the accountancy industry through our cloud-based SaaS solution. Our goal is to bring efficiency and value to the industry, whilst ensuring the highest levels of quality.

Our software uses MS Azure in providing an intuitive and informative interface for our users, supported by multiple servers and integrated technologies.

### THE ROLE

A graduate developer at Inflo shall build their knowledge of our system and the underlying technologies in order to continually develop and improve our software solution. By playing a key role in development decision making, you will directly impact the design and ultimate success of our product.

### YOU WILL

- Develop market leading applications
- Utilise new web & server technology
- Develop front-end & server-side
- Work as part of a focused team

### THE SKILL SET

We are searching for a candidate with a Computer Science (BSc) degree or equivalent work experience, who can show a commitment to continuous learning and demonstrate a strong work ethic. The candidate must be honest, enthusiastic and strive to consistently deliver on time.

Key Skills for the role include:

- ASP.NET MVC
- C# .NET
- HTML
- CSS
- SQL
- Visual Studio

### WHAT WE OFFER

As a member of the Inflo family, you'll also enjoy some pretty special benefits including the following to name a few:

- A competitive salary within a rapidly growing technology company
- Continued professional development
- The opportunity to work with our teams around the globe
- 25 days holiday with an additional 0.5 days for every year of service
- Flexible working environment
  - Opportunity to work from home
  - Casual dress code
