

AUDIT SPECIALIST (METHODOLOGY)

Inflo is a software platform that puts next-generation technologies such as AI and machine learning at accountant's fingertips. It transforms the service accountants provide to clients by performing millions of calculations and analysing thousands of transactions in seconds. This not only saves them time, but also improves the accuracy and quality of their work.

We're the most advanced software of our kind in the world, and we can count some of the world's biggest accounting firms as our clients.

Emerging technologies like AI, machine learning, and process automation are transforming our world and disrupting the accounting sector. We built Inflo so that forward-thinking accounting firms can augment their human expertise with this cutting-edge tech rather than worry about being replaced by it.

Inflo are seeking an individual with intricate working knowledge of external audit, the post holder will work collaboratively with the Inflo team to support customer firms around the world.

THE JOB WORKING ENVIRONMENT, OPPORTUNITIES AND REWARDS:

A truly innovative, high tech, advanced SaaS business.

Incredibly diverse role working with a dynamic management team, building on the international growth of the business.

OVERVIEW:

The role will establish a member of the Inflo team who is seen as an audit specialist – both internally in Inflo and externally with customer firms. Key responsibilities might include (very flexible, and vast scope to build your own role):

- Facilitating workshops with firms to raise awareness of potential process improvement and technology opportunities through technology and behavioural change,
- Providing global guidance and training to audit users in the form of documents, training materials, videos and case studies,
- Maintaining and improving mapping documentation of Inflo against common methodologies / content as Inflo functionality increases,
- Responding to technical audit queries from customer firms or firms raising objections during initial conversations,
- Running user group sessions to identify product enhancements,
- Developing management information to support firm / network level reporting on quality, user behaviour etc,
- Managing the relationship with regulators such as the FRC and QAD and professional bodies such as ICAEW,
- Keynote speaking at international conferences and events.

WHAT'S ON OFFER:

As a member of the Inflo family, you will also enjoy some pretty special benefits, including the following to name but a few:

- Salary: an attractive package within a rapidly growing technology company – based on experience,
- Casual dress code: don't feel like you need to dress like someone you're not when you come to work.
- Flexible working: you know how you work best. So work when you want and from where you want.
- Self-education opportunities: experts are made, not born. That's why we block time out in your calendar for you to spend sharpening your skills each week.
- An extra half-day's holiday for every year: we appreciate loyalty. Enjoy an extra half-day paid holiday for each year you've been with us.
